

Die Punching Machine

Heavy Duty Die Cutting, Creasing & Embossing Platen

The Platen Die Punching Machine is designed for heavy-duty jobs including cutting, creasing, and embossing of various materials such as paper, linoleum, cardboard, corrugated board, plastic, and PVC material.

Key Features

- Electro-magnetic Clutch & Brake system
- Dwell Timing Device for precision
- Electric Impression Counter
- Safety guards for operator protection
- Circuit Locking & Circuit Breaker for enhanced safety
- Robust construction for industrial applications

Technical Specifications

Machine Size	Platen Size	Impressions Per Min	Power Required
20" x 26"	23" x 29"	1600	3 H.P.
22" x 32"	25" x 35"	1500	3 H.P.

Machine Size	Platen Size	Impressions Per Min	Power Required
25" x 37"	28" x 40"	1300	5 H.P.
32" x 42"	36" x 46"	1100	7.5 H.P.
36" x 50"	40" x 54"	1000	7.5 H.P.
41" x 55"	44" x 58"	1000	7.5 H.P.
42" x 62"	46" x 66"	800	10 H.P.
52" x 72"	56" x 76"	700	15 H.P.

Applications

Ideal for manufacturing facilities requiring precision cutting, creasing, and embossing operations on multiple material types. Suitable for packaging, printing, and industrial manufacturing sectors.
