

Eccentric Slotter

Versatile Slotting and Corner Cutting Solution

The Eccentric Slotter adds a high degree of flexibility and versatility to your corrugation plant. Designed to simultaneously slot and corner cut corrugated boards, this machine is suitable for all kinds of corrugation boards while delivering excellent productivity.

Key Features

- Three slotting heads for simultaneous operation
- One corner cutting head
- Gear rack mechanism for easy head positioning
- Adjustable side cutters via screw adjustment
- Suitable for 2/3/5/7/9 ply boards
- Compatible with all types of corrugation boards

- Robust construction for industrial use

Technical Specifications

Size	Slot Depth	Maximum Distance Between 2 Slots (Min.)	Motor Power
75"	18"	5"	3 H.P.
85"	18"	5"	3 H.P.
95"	18"	5"	3 H.P.
105"	18"	5"	3 H.P.

Applications

Essential equipment for corrugated box manufacturers requiring flexible slotting capabilities. Ideal for facilities producing various box sizes and styles with multi-ply corrugated boards. Perfect for operations requiring simultaneous slotting and corner cutting for efficient production workflows.
