

Hand Operated Board Cutter

Manual Precision Cutting Solution

Our Hand Operated Board Cutter is manufactured with ultra-grade raw materials according to exact client specifications to achieve maximum satisfaction. This machine is tested by diligent professionals on various quality parameters to ensure it meets international standards and is completely flawless.

Key Features

- Ultra-grade raw material construction
- Quality-assured blades
- Precision back and front gears
- Manual operation for control and flexibility
- Tested to international quality standards
- Robust and durable design
- Easy to operate and maintain
- Cost-effective cutting solution

Technical Specifications

Size	Cutting Length	Back Working	Front Working	Floor Space
48" x 62"	40"	60"	18"	50" x 70"
58" x 62"	50"	60"	18"	60" x 70"
62" x 72"	60"	60"	18"	70" x 80"

Applications

Perfect for small to medium-scale operations requiring manual control over cutting operations. Ideal for facilities with lower production volumes, custom work, or situations where precision manual cutting is preferred. Suitable for workshops, small packaging units, and custom box manufacturers.
