

Lamination Machine

High-Speed Laminating Solution

This lamination machine provides efficient laminating capabilities for various paper and board materials. With multiple size options and high-speed operation, it's designed to meet the demands of modern packaging and printing facilities.

Key Features

- Multiple width options to suit different needs
- High-speed operation for increased productivity
- Efficient heat distribution system
- Durable construction for continuous operation
- Easy operation and maintenance
- Consistent lamination quality
- Suitable for various material types

Technical Specifications

Size of Machine	Lamination Width	Maximum Speed Per Hour	Power Required	Net Weight (Approx)
24"	24"	1800 ft	1.5 H.P.	1.0 Ton
32"	30"	1500 ft	2 H.P.	1.2 Ton
36"	36"	1500 ft	3 H.P.	1.2 Ton
42"	42"	1500 ft	3 H.P.	1.6 Ton

Applications

Ideal for packaging manufacturers requiring lamination of printed materials, labels, and specialty papers. Perfect for facilities producing laminated corrugated boxes, promotional materials, and protected packaging. Suitable for operations requiring consistent quality lamination at high speeds.
