

# Sheet Cutter Machine

---

## Precision Corrugated Sheet Cutting

This heavy-duty sheet cutter machine is specifically designed for cutting corrugated 2-ply liner with precision and efficiency. It can be synchronized with corrugation machines for seamless production workflows.

### Key Features

- Heavy-duty construction
- Suitable for cutting corrugated 2-ply liner
- Can be synchronized with corrugation machines
- Auto tension system for changing cutting lengths
- Conveyor belt attachment for material handling
- Digital counting meter for production tracking
- High carbon blade for durability and precision
- Reel stand with one roll unwinding shaft
- Best quality bearings throughout
- Complete with all standard accessories

### Technical Specifications

Size	Motor Power
42"	2 H.P.
52"	2 H.P.
62"	2 H.P.
72"	3 H.P.

**Additional Features**

- Digital counting meter for accurate production monitoring
- High carbon blade for long-lasting sharpness
- Auto tension system for quick length adjustments
- Heavy-duty conveyor system for efficient material flow
- Premium quality bearings for smooth operation

**Applications**

Essential equipment for corrugation plants requiring precise sheet cutting capabilities. Ideal for facilities producing standardized corrugated sheets and boxes. Perfect for operations that need synchronized cutting with corrugation production lines for maximum efficiency.
