

# Sheet Pasting Machine

## High-Speed Multi-Ply Board Production

The Sheet Pasting Machine is designed for gluing the fluted side of two-ply board to create corrugated boards of different plies. With speeds up to 150 meters per minute, this machine offers exceptional productivity for corrugation facilities.

### Key Features

- High-speed operation: 150 meters/minute
- Available in 3-roll and 4-roll models
- Designed for gluing fluted corrugated sheets
- Creates multi-ply corrugated boards
- Efficient glue application system
- Robust construction for continuous operation
- Easy maintenance and operation

### Technical Specifications

Size	Motor Power	Weight (3 Rolls) Approx.	Weight (4 Rolls) Approx.
65"	0.5 H.P.	500 kg	650 kg
75"	0.5 H.P.	600 kg	750 kg

Size	Motor Power	Weight (3 Rolls) Approx.	Weight (4 Rolls) Approx.
85"	0.5 H.P.	700 kg	850 kg

**Applications**

Essential for corrugated board manufacturers producing multi-ply boards. Perfect for facilities requiring efficient lamination of 2-ply boards into 3, 5, or 7-ply configurations. Ideal for high-volume production environments where speed and consistency are critical.
