

## Double Color Sheet Printing Machine

---

### High-Efficiency Sheet Printing Solution

This double color sheet printing machine offers high production rates and enhanced efficiency. It prints on paper, boards, and corrugated sheets using either water-based or solvent-based inks, delivering quality results for various printing needs.

#### Key Features

- Prints on paper, boards, and corrugated sheets
- Compatible with water-based and solvent-based inks
- Hard chromium plated impression roller for sharp, quality printing
- Variable speed controller with D.C. Motor
- Electronic digital sensor counter with panel box
- Reduces wastage and improves quality
- Robust industrial construction
- High production capacity

#### Technical Specifications

Machine Size	Printing Area	Motor Required	Floor Space	Machine Height	Gross Weight	Production Capacity/Hr
52" x 88"	50" x 85"	3 H.P.	204" x 82"	62"	2400 kg	1200 sheets
62" x 88"	60" x 85"	3 H.P.	204" x 92"	62"	2800 kg	1200 sheets

### Applications

Perfect for corrugated box manufacturers requiring in-house printing capabilities. Ideal for packaging companies producing custom printed boxes, promotional materials, and branded packaging. Suitable for facilities requiring high-volume, quality printing on various substrates.
